**Results Management:**

International Cases:

In 2018, the ITA processed one (1) Adverse Analytical Finding (AAF) for which ITTF was the Testing and Results Management Authority, which did not result in an anti-doping rule violation.

National Cases:

ITA followed up on four (4) ADRV processed under the authority of NADOs. It must be highlighted that such figure may not be complete since ITA is only aware of such "national" cases if reported in ADAMS or directly by the NADO.
